Bug Reports

Website Overview

AliExpress is a global online retail platform, founded in 2010, that connects consumers with businesses, manufacturers, and suppliers from around the world. As part of the Alibaba Group, AliExpress offers a wide variety of products ranging from electronics, clothing, and home goods to beauty products, toys, and more. With a focus on international commerce, AliExpress has become a popular marketplace for consumers seeking affordable goods and access to a broad selection of products from international sellers.

Testing Scope

The scope of testing included validating the core functionalities, performance, and reliability of the AliExpress website. The objective was to ensure that the platform operates smoothly across different scenarios, devices, and user interactions while identifying any potential defects or inconsistencies.

Exit Criteria

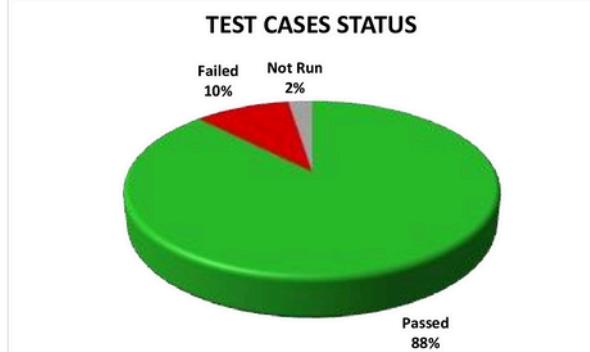

All test cases must be executed, with high and major priority bugs resolved and retested to ensure core functionalities are unaffected. The platform must meet performance, compatibility and security benchmarks across all supported browsers and devices, with at least 95% test coverage achieved.

Conclusions

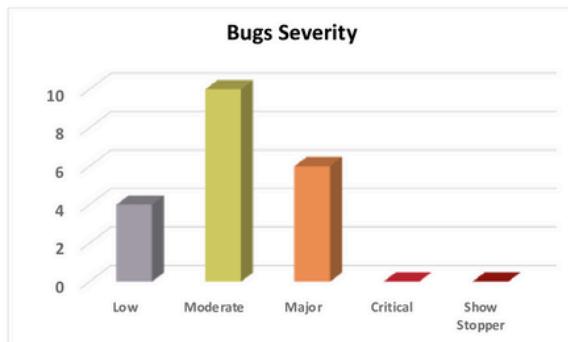

After testing the website's core functionality, performance, usability, and security, a total of 20 bugs were identified—14 of low to medium severity and 6 of major severity. Despite these findings, the site operates smoothly and meets the required benchmarks. Therefore, I conclude that the AliExpress website is **stable for release**.

TestRail

I used TestRail to create, manage, and execute test cases. Test execution results were also documented in TestRail, providing clear visibility into the testing progress. This systematic approach helped track coverage, identify issues efficiently, and maintain an organized workflow throughout the testing process.

Test Cases

ID	Title	Section
C1	Verify that the Home page can be reached easily from anywhere inside the site.	Header
C2	Verify search suggestions appear as the user types (e.g: typing "iPhone"" should suggest iPhone types).	Search Bar
C3	Verify search results relevancy for different keywords (e.g: searching ""Nike shoes"" should return relevant Nike-branded shoes).	Search Bar
C4	Verify filters & sorting work correctly (e.g: applying the Price option as Low to High should reorder results correctly).	Search Bar
C5	Verify that multiple filters can be applied simultaneously, such as price, type, color etc.	Search Bar
C6	Verify that multiple picks can be chosen inside filters options (e.g: choosing Red and White in the Color filter when searching for shoes).	Search Bar
C7	Verify incorrect search terms return relevant suggestions (e.g: "iphon case" should suggest "iPhone case").	Search Bar
C8	Verify category-specific searches work properly (e.g: searching "Men's T-shirt" should return only men's T-shirts).	Search Bar
C9	Verify search bar retains search history after search execution.	Search Bar
C10	Verify that after searching for an item that doesn't exist, an appropriate message is displayed (e.g: "No results found").	Search Bar
C11	Verify that searching is available using special characters (e.g: !@#\$).	Search Bar
C12	Verify that the search supports multiple languages, such as Hebrew.	Search Bar
C13	Verify that the search functions even when there's no internet connection and displays an appropriate message (e.g: 'No internet connection').	Search Bar
C14	Verify that after the internet connection is restored after a search has been performed, the search updates automatically and displays relevant results.	Search Bar
C15	Verify that the search functions properly when inserting many words (e.g: 50 characters).	Search Bar
C16	Verify that the search suggestions reset when the search words are deleted.	Search Bar
C17	Verify that the search displays the most relevant results at the top of the page.	Search Bar
C18	Verify that the search displays results quickly without long loading time.	Search Bar

Go to TOC

C19	Verify that the search is working properly on different mobile phones.	Search Bar
C20	Verify search results update dynamically when filters are applied.	Search Bar
C21	Verify that all search results display the product pricing and buyers rating information.	Search Bar
C22	Verify that the 'Search by image' option is available by uploading or dragging an image into the search bar.	Search Bar
C23	Verify that the 'Search by image' option returns relevant results.	Search Bar
C24	Verify that when a large image is uploaded into the 'Search by image' option, an appropriate message about the excessive image size is displayed.	Search Bar
C25	Verify that the search bar is accessible on all pages.	Search Bar
C26	Verify that the search bar is "sticky" and remains visible after scrolling down.	Search Bar
C57	Verify that the 'App Store' button under the 'Download the AliExpress app' option redirects to the app's download page in Apple Store.	AliExpress App
C28	Verify that the 'Google Play' button under the 'Download the AliExpress app' option redirects to the app's download page in Google Play.	AliExpress App
C29	Verify that the QR code functions correctly and opens the AliExpress site on various mobile devices.	AliExpress App
C30	Verify that all languages presented in the header are available and that the site updates accordingly after selecting one.	Languages
C31	Verify that switching to a different language correctly translates all site content without layout or readability issues.	Languages
C32	Verify that all currencies presented in the header are available and that prices update accordingly after selecting one.	Languages
C33	Verify that the displayed prices after changing the currency match the correct exchange rates.	Languages
C34	Verify successful login using a correct email and password.	Register/Sign in
C35	Verify successful login using a correct phone number and password.	Register/Sign in
C36	Verify successful login with the SMS code sign in option.	Register/Sign in
C37	Verify successful login with a Google account.	Register/Sign in
C38	Verify successful login with a Facebook account.	Register/Sign in
C39	Verify successful login with a Twitter account.	Register/Sign in
C40	Verify successful login with an Apple account.	Register/Sign in

[Go to TOC](#)

C41	Verify that a confirmation code is sent after registering with a valid email.	Register/Sign in
C42	Verify successful registration using the confirmation code.	Register/Sign in
C43	Verify that a confirmation code is sent after registering with a valid phone number.	Register/Sign in
C44	Verify successful registration with a Google account.	Register/Sign in
C45	Verify successful registration with a Facebook account.	Register/Sign in
C46	Verify successful registration with a Twitter account.	Register/Sign in
C47	Verify successful registration with an Apple account.	Register/Sign in
C48	Verify that clicking on 'Forgot Password' redirects to the password reset page.	Register/Sign in
C49	Verify that a reset password email is sent after entering an existing user email address.	Register/Sign in
C50	Verify that a reset password SMS is sent after entering an existing user phone number.	Register/Sign in
C51	Verify successful login after resetting the password.	Register/Sign in
C52	Verify that a user can log in successfully after updating their password.	Register/Sign in
C53	Verify that a user can log out successfully from the website.	Register/Sign in
C54	Verify that the 'Trouble signing in?' link redirects to the password reset page.	Register/Sign in
C55	Verify that all the links at the bottom of the Register/Sign in window are available and redirect to the correct pages.	Register/Sign in
C56	Verify that registering with an invalid email (123@gmal.net) displays an error message (e.g: "Please enter a valid email address").	Register/Sign in
C57	Verify that registering with an email longer than 100 Characters displays an error message (e.g: "Email exceeds character limit").	Register/Sign in
C58	Verify that logging in with a correct email and an incorrect password displays an error message (e.g: "Your email or password is incorrect").	Register/Sign in
C59	Verify that after 5 incorrect password attempts to sign in, the session is suspended and an appropriate error message is displayed (e.g: "Too many attempts, try again later").	Register/Sign in
C60	Verify that a user can easily view their order history.	Orders
C61	Verify that a user is able to track their orders successfully.	Orders
C62	Verify that a user can easily view their order details, including order date, payment method and other relevant information.	Orders
C63	Verify that a user can successfully search a specific order in the order history using the product name.	Orders

[Go to TOC](#)

C64	Verify that a user can successfully search a specific order in the order history using the order ID number.	Orders
C65	Verify that the order time filter functions correctly (Last 6 months, last year etc.).	Orders
C66	Verify that a user can successfully add an item from their order history to the cart.	Orders
C67	Verify that a user can reorder previous purchases.	Orders
C69	Verify that a user can successfully delete an item from their order history.	Orders
C70	Verify that a user can successfully request a refund and receive a confirmation message.	Orders
C71	Verify that the refund reason list is comprehensive and includes the most likely cases.	Orders
C72	Verify that a refund request cannot be submitted without selecting a reason from the list.	Orders
C73	Verify that there is an option to add free text for further clarification of the issue.	Orders
C74	Verify that a user can successfully upload images/videos to confirm the item's issue.	Orders
C75	Verify that the shipment arrives within the specified time.	Orders
C76	Verify that the delivered item is in good condition, free of damage, and matches the product description, including specifications such as size, color, and features.	Orders
C77	Verify that when a delivery is delayed, an appropriate message is sent to inform the user.	Orders
C78	Verify that if a delivery is delayed by 45 days or more, the user is refunded according to the site's return policy.	Orders
C79	Verify that a user can easily view their payment information.	Payment
C80	Verify that a user can successfully add new payment information.	Payment
C81	Verify that a user can successfully remove their payment information.	Payment
C82	Verify that the site supports all major card types (Visa, Mastercard, American Express etc.).	Payment
C83	Verify that an appropriate error message is displayed when a user tries to add a credit card with incorrect information, such as an invalid expiration date, card number, CVV etc.	Payment
C84	Verify that a user cannot add a credit card that is already saved and that an appropriate error message, such as 'This card already exists,' is displayed.	Payment
C85	Verify that a user can track the status of their refund request.	Refund and Return

C86	Verify that a user receives a response regarding the refund within 2 business days.	Refund and Return
C87	Verify that a user can successfully receive a refund to the correct payment method.	Refund and Return
C88	Verify that a user can appeal the refund decision.	Refund and Return
C89	Verify that a user can successfully add a feedback on a received item.	Feedback
C90	Verify that a user can easily view their account information (name, email, address etc.).	Personal Information
C91	Verify that a user can successfully update any of their personal information, such as email address, contact address, phone number, etc.	Personal Information
C92	Verify that a user can easily delete their account.	Personal Information
C93	Verify that after account deletion, the user cannot log in with the same credentials.	Personal Information
C94	Verify that a user can successfully update their password.	Security Information
C95	Verify that when changing the password, the user is required to verify their identity using a confirmation code via email, credit card number or another method.	Security Information
C96	Verify that the new password is not updated until it matches in both the 'New Password' and 'Confirm Password' fields.	Security Information
C97	Verify that there is a character limit in both fields when changing the password.	Security Information
C98	Verify that when a weak password, such as '123456' is entered, the password is not updated and an appropriate message is displayed (e.g: "Weak password").	Security Information
C99	Verify that a user can easily view their shipping address details.	Shipping Address
C100	Verify that a user can successfully edit their shipping address details.	Shipping Address
C101	Verify that a user can successfully remove their saved shipping address.	Shipping Address
C102	Verify that a user cannot complete their shipping address update with required fields left empty.	Shipping Address
C103	Verify that special characters cannot be inserted into the address fields and that an appropriate error message is displayed.	Shipping Address
C104	Verify that the shipping address cannot be updated with an incorrect zip code.	Shipping Address

[Go to TOC](#)

C105	Verify that a user cannot add the same shipping address that already exists.	Shipping Address
C106	Verify adding/removing items from the wish list works properly.	Wish List
C107	Verify availability status updates for wish list items.	Wish List
C108	Verify wish list items persist across sessions.	Wish List
C109	Verify users can move items from wish list to cart.	Wish List
C110	Verify price changes reflect correctly in wish list.	Wish List
C111	Verify that the 'Add to cart' button functions correctly and the item is successfully added to the cart.	Cart
C112	Verify that the item can be removed easily after added to the cart.	Cart
C113	Verify that the item price updates correctly when the quantity is changed in the cart.	Cart
C114	Verify that shipping fee is displayed, even for orders with free delivery.	Cart
C115	Verify that the cart remains updated with the added items even after exiting and returning to the site.	Cart
C116	Verify multiple products from different sellers can be added.	Cart
C117	Verify that multiple items can be selected and removed simultaneously from the cart when it contains a large number of items.	Cart
C118	Verify that all items in the cart are clearly displayed and easy to view.	Cart
C119	Verify that an item can be moved from the cart to the wish list.	Cart
C120	Verify that the item count in the cart logo (in the header) updates instantly when the user adds or removes items.	Cart
C121	Verify that the 'Checkout' button redirects to the Order Summary page.	Cart
C122	Verify that all the necessary information is presented (shipping address, estimated delivery time, payment method etc.).	Order Summary
C123	Verify that a user can edit any information before purchase, including the shipping address, credit card etc.	Order Summary
C124	Verify that a user can successfully complete the purchase by clicking the 'Pay Now' button.	Order Summary
C125	Verify that different payment options, such as PayPal, are suggested during checkout.	Order Summary
C126	Verify successful payment processing for all methods (credit card and PayPal).	Order Summary
C127	Verify that a purchase confirmation email is sent after the purchase is completed.	Order Summary

[Go to TOC](#)

Bug Reports

[AL-1] All item filter options are radio buttons, and users can't select multiple options within the same category, such as color. Created: 08/Mar/25 Updated: 08/Mar/25

Status:	To Do
Project:	AliExpress

Type:	Bug	Priority:	Low
Reporter:	Or'ad Menahem	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0

Severity: S4- Moderate

The screenshot shows a search results page for 'shoes' on AliExpress. On the left, there is a sidebar with a 'Color' filter. The 'White' option is selected, indicated by a checked radio button and a blue callout box labeled 'Radio buttons'. Other color options listed are All, Black, Blue, Red, Green, Pink, Purple, Yellow, Grey, and Orange. The main area displays several shoe products with their prices and shipping information.

Product	Price	Shipping	Store
2024 New Summer Men's Shoe...	₪36.83	Free shipping over ₪38	Trade Center Store
2025 Spring/Summer New Sing...	₪547.82		
Trendy Lefo Shoes 2023 Summ...	₪33.34	Extra 2% off with coins...	Sports Swag Store

Go to TOC

Description

Steps to Reproduce:

1. Type in ‘Shoes’ in the search bar
2. Navigate to the ‘Color’ filter located on the left side of the page
3. Scroll down the filter section

Actual result:

All buttons, except those in the ‘Delivery Options & Services’ section, are radio buttons

Expected Result:

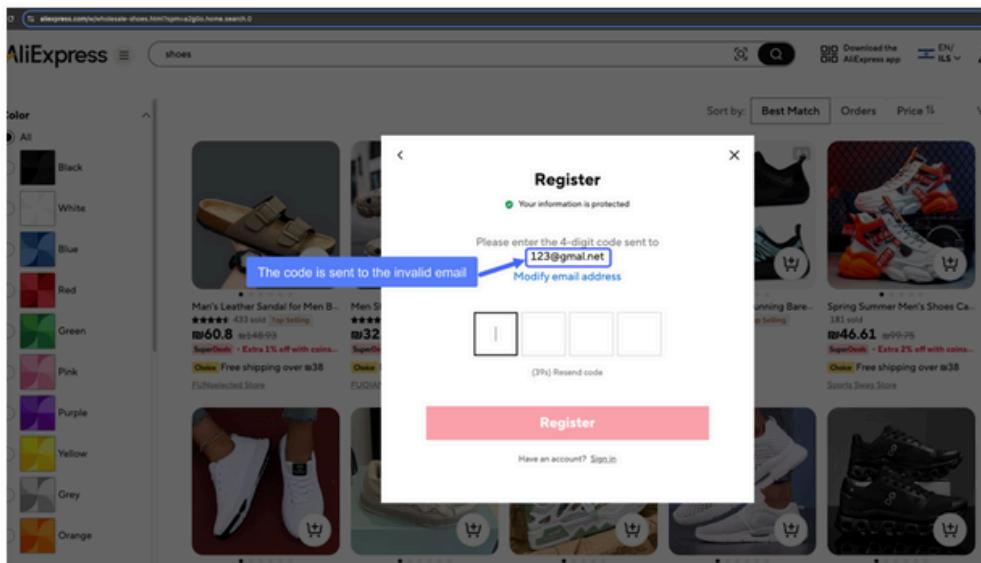

The buttons should be standard checkboxes that allow multiple selections

[AL-2] Registering with an invalid email is possible. Created: 09/Mar/25 Updated: 09/Mar/25

Status: To Do
Project: AliExpress

Type:	Bug	Priority:	High
Reporter:	Or'ad Menahem	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0

Severity: S3- Major

Go to TOC

Description

Steps to Reproduce:

1. Go to the registration page
2. Enter an invalid email address (e.g: 123@gmal.net)
3. Slide the bar for verification

Actual Result:

Registration code is sent to the invalid email address

Expected Result:

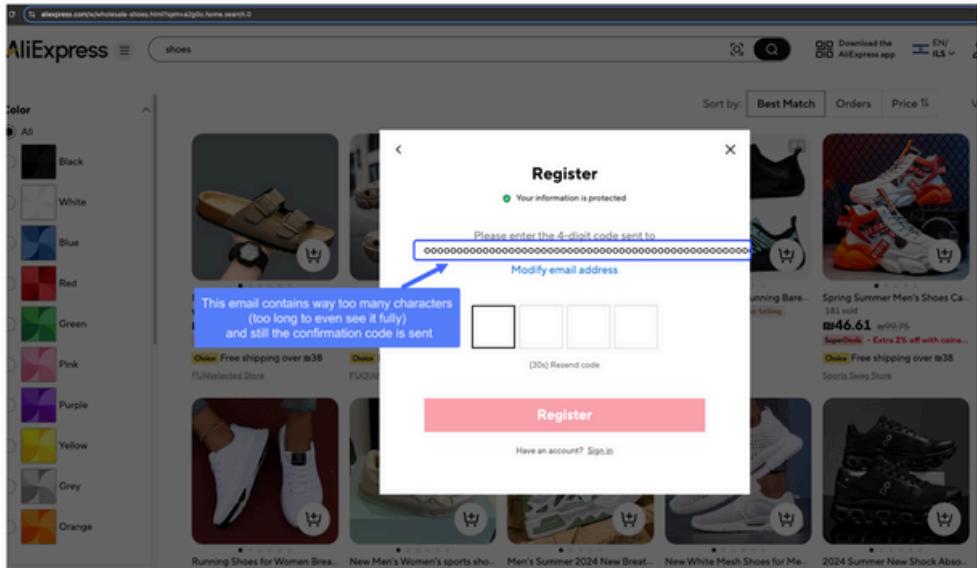

The system should display an error message, such as "Please enter a valid email address", and prevent registration

[AL-3] Registering with an email containing 100 characters is possible. Created: 09/Mar/25 Updated: 09/Mar/25

Status:	To Do
Project:	AliExpress

Type:	Bug	Priority:	Medium
Reporter:	Or'ad Menahem	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0

Severity: S4- Moderate

Go to TOC

Description

Steps to Reproduce:

1. Go to the registration page
2. Enter an email address containing 100 characters (e.g: ooooo...@gmail.com)
3. Slide the bar for verification

Actual Result:

Registration code is sent

Expected Result:

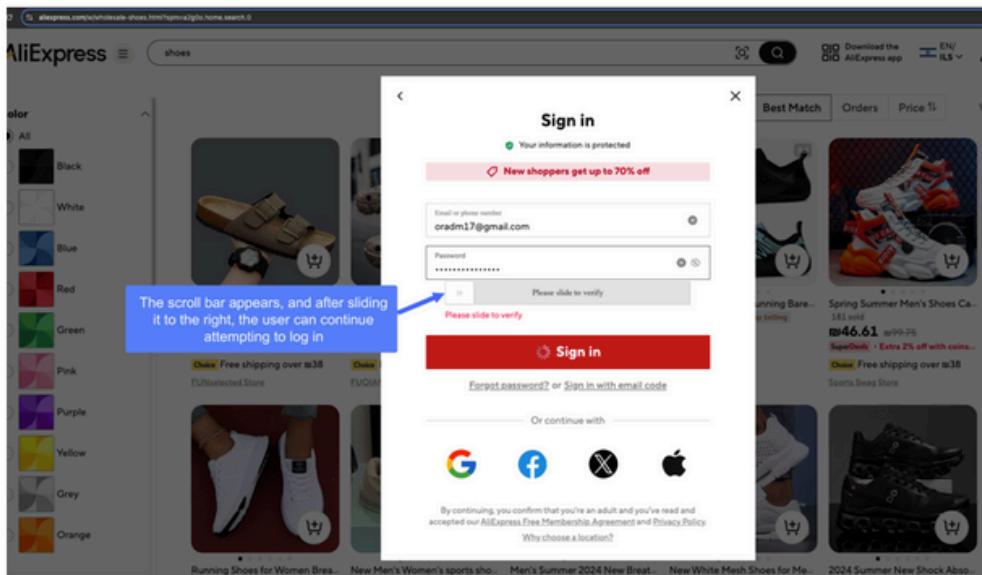

The system should impose a reasonable character limit on the email field and display an error message if the limit is exceeded

[AL-4] There is no restriction on the number of login attempts. Created: 09-Mar-25 Updated: 09-Mar-25

Status:	To Do
Project:	AliExpress

Type:	Bug	Priority:	High
Reporter:	Or'ad Menahem	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0

Severity: S3- Major

Description

Steps to Reproduce:

1. Go to the sign in page
2. Enter a valid email address (e.g: oradm17@gmail.com)
3. Enter incorrect password 5 times
4. Slide the verification scroll bar to the right

Actual Result:

The system allows unlimited login attempts without any security restrictions

Expected Result:

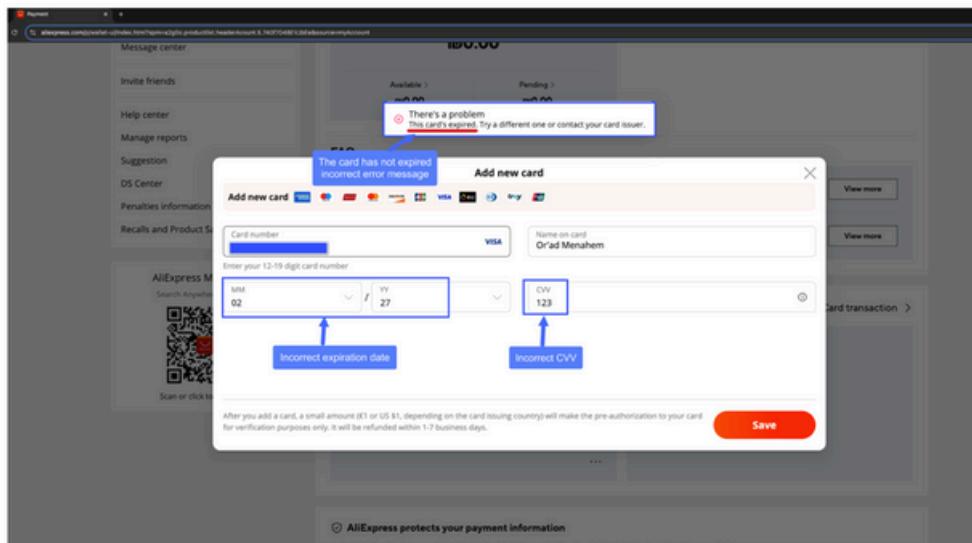

After five incorrect login attempts, the system should enforce a security measure such as temporarily locking the account or displaying a proper warning message

[AL-5] An incorrect error message is displayed when adding a credit card with an incorrect CVV and expiration date. Created: 09/Mar/25 Updated: 09/Mar/25

Status:	To Do
Project:	AliExpress

Type:	Bug	Priority:	Medium
Reporter:	Or'ad Menahem	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0

Severity: S3- Major

Description

Steps to Reproduce:

1. Go to Account→Payment
2. Click on ‘Add New Card’
3. Enter a valid card number and an incorrect CVV and expiration date
4. Click ‘Save’

Actual Result:

An incorrect error message appears saying that the card has expired when the expiration date is 02/27

Expected Result:

The system should display a correct error message, such as: "Invalid CVV. Please enter the 3-digit code from the back of your card" or "Invalid expiration date. Please enter a valid date"

[AL-6] The system allows setting a weak password (e.g: '123456') without restrictions.

Created: 09/Mar/25 Updated: 14/Mar/25

Severity: S3- Major

The screenshot shows a web browser window for AliExpress account settings. The URL in the address bar is https://www.aliexpress.com/account-center/update-password.html?_addShare=0&_amp_rightAction=https%3A%2F%2Fwww.aliexpress.com%2Faccount_setting. The page title is "Change password". It includes fields for "New password" and "Confirm password", both containing the value "123456". A red button labeled "Update password" is at the bottom. A blue box with the text "The 'Update Password' button is enabled" has an arrow pointing to the "Update password" button.

Change password

Must be 6-20 characters (letters, numbers or symbols)

New password
123456

Confirm password
123456

Update password

The 'Update Password' button is enabled

Description

Steps to Reproduce:

1. Go to Account->Settings->Security Information
2. Click on 'Change Password'
3. Click on 'With Your Email' button to verify your identity
4. Enter the code sent to your email
5. Enter the password '123456' in both fields
6. Click on 'Update Password'

Actual Result:

The password is updated successfully without any warning or restriction

Expected Result:

The system should enforce a minimum password strength policy (e.g: at least 8 characters, with a mix of letters, numbers, and symbols) and display an error message if the password is weak

[AL-7] The system allows updating the address with special characters in the address field (!@#). Created: 09/Mar/25 Updated: 09/Mar/25

Status:	To Do
Project:	AliExpress

Type:	Bug	Priority:	Medium
Reporter:	Or'ad Menahem	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0

Severity: S4- Moderate

The screenshot shows the AliExpress account settings page with the 'Shipping address' section highlighted. A tooltip 'Special characters are enabled in the address field' points to the address input field, which contains the character sequence 'ip#'. The address field has a placeholder 'Search by ZIP code, street, or address'. Other fields include 'Country/region' (set to Israel), 'Contact information' (name: Or'ad Menahem, phone: +972 0547683646), 'Address' (city: Tel Aviv - YAFO, zip: 6713701), and a checkbox for 'Set as default shipping address'.

Description

Steps to Reproduce:

1. Go to Account→Shipping Address
2. Click on 'Add New'
3. Enter your contact information (name and phone number)
4. Enter '!@#' in the address field
5. Choose your district from the list (Tel Aviv-Yafo)
6. Enter your zip code (6713701)
7. Click 'Confirm'

Actual Result:

The system allows updating the address with special characters without any validation or error message

Expected Result:

The system should validate the address field and reject any special characters that are not allowed in an address. An error message should be displayed if invalid characters are entered

[AL-8] The system allows adding an invalid zip code when updating an address (e.g.'1234567').

Created: 09/Mar/25 Updated: 09/Mar/25

Status:	To Do
Project:	AliExpress

Type:	Bug	Priority:	Medium
Reporter:	Or'ad Menahem	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0

Severity: S4- Moderate

The screenshot shows the AliExpress account dashboard with the "Shipping address" section selected. On the right, a modal window titled "Shipping address" is open. In the "Address" field, the user has entered the invalid zip code "1234567". A blue arrow points from this input field to a tooltip message that reads "An invalid zip code is entered".

Shipping address

Country/region

Contact information

Address

An invalid zip code is entered

Description

Steps to Reproduce:

1. Go to Account→Shipping Address
2. Click on 'Add New'
3. Enter your contact information (name and phone number)
4. Enter your street name (Allenby)
5. Choose your district from the list (Tel Aviv-Yafo)
6. Enter invalid zip code (1234567)
7. Click 'Confirm'

Actual Result:

The system allows saving the address with an invalid zip code

Expected Result:

The system should validate the zip code format and ensure it is correct before allowing it to be saved. An error message should be displayed if the zip code is invalid

[AL-9] The system allows entering the same address information multiple times without restriction. Created: 09/Mar/25 Updated: 09/Mar/25

Status:	To Do
Project:	AliExpress

Type:	Bug	Priority:	Low
Reporter:	Or'ad Menahem	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0

Severity: S4- Moderate

The screenshot shows the AliExpress shipping address management page. On the left, there's a sidebar with navigation links like Home, Account, and Shipping address. The Shipping address link is highlighted with a red border. The main area has a title "Shipping address" and a "Add new" button. Below it, there are three address entries, each with an "Edit" and "Delete" link. All three entries are identical, showing "Or'ad Menahem, +972 0547683646" as the name and phone number, "Default address" status, and a location in "Tel Aviv, Israel, 1234567". A blue callout box at the bottom center states "Same address updated 3 times", with arrows pointing from the text to each of the three identical address entries.

Description

Steps to Reproduce:

1. Go to Account→Shipping Address
2. Click on 'Add New'
3. Enter your contact information (name and phone number)
4. Enter an existing address
5. Click 'Confirm'
6. Repeat steps 2 to 5

Actual Result:

The system allows the user to save duplicate address information without any warning or error message

Expected Result:

The system should prevent users from saving duplicate addresses and either display a message indicating the address already exists or merge the existing address

[AL-10] Cart logo in the header does not update when adding or removing items from the cart.

Created: 10/Mar/25 Updated: 10/Mar/25

Status:	To Do
Project:	AliExpress

Type:	Bug	Priority:	Medium
Reporter:	Or'ad Menahem	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0

Severity: S4- Moderate

The screenshot shows the AliExpress website interface. At the top, there is a search bar with the word "sneaker". Below the search bar, the header includes a "Cart" icon with a blue border and a white number "1". A blue arrow points to this icon with the text "An item's been added to the cart". To the right of the header, there is a "Cart" button with a blue border and a white icon. A blue arrow points to this button with the text "Cart logo does not update". The main content area displays a product listing for "Nike New Court Vision 1 Low Shoes Men's and Women's Casual Fashion Sn...". The price is listed as "Rs 980.41". The "Summary" section on the right shows a subtotal of "Rs 980.41", shipping as "Free", and an estimated total of "Rs 980.41". A red button labeled "Checkout (1)" is visible. Below the summary, there are sections for "Fast delivery", "Security & Privacy", and "Safe Payments".

Description

Steps to Reproduce:

1. In the search bar, type in 'Nike Shoes'
2. Go to the item 'Nike New Court Vision 1' and click on the add to cart logo
3. Choose the first color (FQ7628-100)
4. Choose the size (45)
5. Click on 'Add to Cart'
6. Click on 'Go to cart' on the right bar

Actual Result:

The cart icon in the header does not update accordingly and still shows 0 items

Expected Result:

The cart icon in the header should instantly update to reflect the correct number of items in the cart after adding or removing an item

[AL-11] Men's subcategories contain women's items. Created: 10/Mar/25 Updated: 10/Mar/25

The screenshot shows a search results page for 'shoes' on the AliExpress website. The page features a grid of shoe products with details like price, rating, and seller information. At the bottom, there's a navigation bar with a 'Go to page' input field. A blue box highlights this field. Below it, a blue box highlights the '1' button in the pagination area. Another blue box highlights the '260' button in the same area.

Description

Steps to Reproduce:

1. Go to the 'Shoes' category
2. Click on 'Sneaker'
3. Scroll down to the bottom of the page
4. In the 'Go to page' field, insert a number smaller than the minimum pages (-2) and press Enter

Actual Result:

The user is redirected to the first page without receiving any error message or feedback

Expected Result:

The user should be informed of the invalid input

[AL-17] Non-numeric characters before a number in the 'Go to page' field still allow redirection.

The screenshot shows the AliExpress homepage. A blue callout box highlights a red frame around an image of a person wearing a hat and sunglasses, indicating that after switching to 'Accessibility' mode, only a red frame appears around images without any contrast enhancement. The page features a navigation bar with 'AliExpress' and a search bar, followed by sections for 'Shop by category' and various product categories like 'Accessories', 'Sports & Entertainment', 'Home & Garden', 'Home Appliances', 'Furniture', and 'Hair Extensions & Wigs'.

Description

Steps to Reproduce:

1. Go to Account-> Accessibility

Actual Result:

Color contrast fails accessibility standards.

Only a red frame is added to images when hovering with the mouse, and in some images the frame disappears after a second.

Expected Result:

Sufficient color contrast should be provided for readability and alternative text should be available for images and non-text elements
